The SAPTA Working Group is comprised of public and private sector investigators from the International Association of Financial Crimes Investigators (IAFCI) that are committed to help safeguard terminals from both physical and logical attacks. The annual working group meeting brings together SAPTA members and other subject matter experts from your community and across the globe to discuss new trends, devices, techniques, and case success stories involving payment terminal crimes and the criminal organizations behind them.

Please be aware that this meeting is intended for subject matter experts and investigators who regularly work skimming and access device fraud investigations; this is not a Skimming 101 training.

We Appreciate our Sponsors!
